FRONTEND (VITEST)

Testing strategy

Layer	Tool	What it verifies	Tests
API / Feature	Laravel PHPUnit	Real endpoints: packages, travels, admin access, auth	28
Unit	Laravel PHPUnit	Model logic (platform settings)	4
Component / Unit	Vitest + Testing Library	UI components, class merger, i18n FR/EN/AR parity	9

Backend suite — `php artisan test`

PASS Tests\Unit\ExampleTest

✓ that true is true

0.01s

PASS Tests\Unit\SettingTest

✓ it falls back to default values

0.90s

✓ it persists and casts a boolean setting

0.04s

✓ it casts numeric settings to numbers

0.04s

✓ merged settings include every default key

0.04s

PASS Tests\Feature\Admin\AdminAccessTest

✓ guest cannot access admin area

0.10s

✓ regular user is forbidden from admin area

0.10s

✓ admin can access admin area

0.04s

PASS Tests\Feature\Auth\AuthenticationTest

✓ users can authenticate using the login screen

0.09s

✓ users can not authenticate with invalid password

0.25s

✓ users can logout

0.05s

✓ logout route requires authentication

0.04s

PASS Tests\Feature\Auth>EmailVerificationTest

✓ email can be verified

0.05s

✓ email is not verified with invalid hash

0.06s

PASS Tests\Feature\Auth>PasswordResetTest

✓ reset password link can be requested

0.27s

✓ password can be reset with valid token

0.27s

PASS Tests\Feature\Auth\RegistrationTest

✓ new users can register

0.09s

PASS Tests\Feature\ExampleTest

✓ the application returns a successful response

0.04s

PASS Tests\Feature\Packages\PackageTest

✓ guest cannot create a package

0.05s

✓ authenticated user can create a package

0.10s

```
✓ package creation requires mandatory fields
0.06s
✓ departure and arrival cities must differ
0.05s
✓ user only sees their own packages
0.08s
✓ owner can delete their package
0.05s
✓ user cannot delete someone elses package
0.05s

PASS Tests\Feature\Travels\TravelTest
✓ guest cannot publish a travel
0.05s
✓ verified traveler can publish a travel
0.05s
✓ non traveler cannot publish a travel
0.04s
✓ traveler without approved vehicle cannot publish
0.05s
✓ travel creation requires mandatory fields
0.05s
✓ travels listing is public
0.06s
✓ featured travels are limited to four
0.07s

Tests:    32 passed (75 assertions)
Duration: 4.00s
```

Frontend suite — npm test

```
coliflow/client - vitest run

> client@0.0.0 test
> vitest run

RUN v3.2.6 C:/Users/pc/Desktop/ColiFlow/client

✓ src/test/i18n.test.js (3 tests) 21ms
✓ src/lib/utils.test.js (4 tests) 32ms
✓ src/ui/BadgeUi.test.jsx (2 tests) 91ms

Test Files  3 passed (3)
Tests       9 passed (9)

Start at    14:30:31
Duration    15.50s (transform 203ms, setup 5.45s, collect 5.23s, tests 144ms, environment 22.55s, prepare 1.22s)
```

Real bugs found & fixed through testing

- **MySQL-only migration** — a migration used `ALTER TABLE ... MODIFY ... ENUM`, which only works on MySQL. Guarded it to MySQL/MariaDB so the app is database-portable.
- **MySQL-only query** — the package dashboard used the `YEARWEEK()` function. Rewrote the weekly stats in PHP — portable and one fewer query.
- **Stale auth tests** — 5 scaffolded auth tests no longer matched the customised registration / verification / reset flow. Updated them to the real contract.

■ How to run

```
# From the project root – runs both suites side by side
npm test

# Or individually
npm run test:server # Laravel / PHPUnit
npm run test:client # Vitest
```
